SKILLS

- Programming Languages: Java, PHP, Python, JavaScript
- Technologies: HTML, CSS, React, Node.js, WebRTC, Magento2, Django
- Tools: MediaPipe, OpenCV, Bitbucket, Github, RAG
- Other: Full-Stack Development, AI, NLP, UI/UX Design, Security, Networking, Data Handling, Leadership, Stakeholder Communication, Feedback Incorporation

PROJECTS

Stock Trading App Simulation

- Developed a live stock trading simulation app using Next.js, **Node.js**, and MongoDB integrated the Upstox API to supply real-time market data, enabling realistic trading simulations for 200+ users.

HandyMath: gesture-controlled calculator

- Built an AI-powered calculator using **Python**, **MediaPipe**, and OpenCV to perform arithmetic via hand gestures, *achieved over 90% accuracy through extensive real-time testing.*

POSITION OF RESPONSIBILITY

Head, IT Event – Abhyuday | MSRIT

- Organized and led a web development competition and hackathons for 300+ participants, focusing on **full-stack technologies** and promoting **industry best practices**.

EDUCATION

MCA

M S Ramaiah Institute of Technology

- **CGPA:** 9.25 | 2024

B.Sc Electronics

MES Degree College

- **CGPA:** 7.70 | 2021

PROFESSIONAL EXPERIENCE

Brady Corporation Pvt Ltd

Ecommerce Developer - Trainee

05/2024 – present

- **Architected a custom Magento 2 backend module** to dynamically render promotional widgets on Product Detail Pages (PDPs) across 5,000+ SKUs, significantly enhancing marketing flexibility and campaign execution speed.
- **Engineered seamless SAP–Magento 2 integration** to enable real-time synchronization of 500+ daily B2B orders, reducing order processing latency by ~40% and minimizing manual reconciliation errors.
- **Developed the Website Product Data (WPD) module** to streamline the generation of structured dealer request packages, producing 21+ CSV and TAR files per request, and handling 4+ requests daily—earning the **Proficiency Award** for exceptional contribution and innovation.
- **Automated WPD workflows** using Magento CRON jobs (executed 4x per day), combined with log rotation and cleanup routines to sustain high-performance standards on shared cloud infrastructure.
- **Achieved ~90% reduction in manual workload** for external dealers by implementing full-cycle automation for data exports and media packaging, accelerating product onboarding and partner satisfaction.
- **Led critical modernization tasks in the Magento 2 migration project**, including the refactoring of legacy Magento 1 modules, ensuring business logic continuity and integrating **OpenSearch** for scalable, fast product discovery—**recognized with a Team Award** upon successful production launch.
- **Managed backend deployments and application lifecycle** across AWS infrastructure (EC2, S3, RDS), supporting scalable performance, database uptime, and secure media handling in a multi-environment setup.

AWARDS

First Place – Coding Competition, Semaphore 2023, NMIT IT Event
